Vitor Madalosso

Full Stack Engineer | React, Next.js, TypeScript, Node.js, PostgreSQL

Porto Alegre, Brazil | Remote, US Eastern hours | vitorconnected@gmail.com |
linkedin.com/in/vmadalosso | github.com/vmadalosso

Summary

Full stack engineer working mostly in React, Next.js and TypeScript, with Node.js and PostgreSQL (Supabase) on the back end. I'm currently building v2 of IZZA, a B2B quoting and ordering platform, and I take freelance projects on the side. I started out in tech support for an e-commerce platform with 500+ stores, which is where I learned to debug fast and explain problems to non-technical people.

Skills

- **Frontend:** React, Next.js (App Router), TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Angular, React Native
- **Backend:** Node.js, NestJS, Express, PHP, Laravel, REST APIs, Zod
- **Database:** PostgreSQL, Supabase (Auth, RLS, Edge Functions), MS SQL Server
- **Testing and tools:** Jest, Docker, Git (Git Flow), Jira, Claude Code
- **Languages:** English (fluent), Portuguese (native), Spanish (basic)

Experience

Full Stack Engineer | IZZA

Jun 2026 - Present | Porto Alegre, Brazil (remote)

B2B platform where institutional buyers get quotes from suppliers, compare prices and place orders.

- Building v2 of the platform (already live), working on everything from the database to the UI
- React, TypeScript, Tailwind and shadcn/ui on the front end; Supabase (Postgres, Row-Level Security, Auth, Edge Functions) on the back end
- Shipping to production through Git Flow, with tasks tracked in Jira
- Using Claude Code daily with project rules, custom commands, MCP servers and hooks set up for our codebase, which leaves more time for code review and testing

Full Stack Developer | Freelance

Jul 2018 - Present | Remote

- Deliver web applications, custom systems and landing pages for clients in different industries
- Handle each project myself, from requirements and estimates to development and support after launch
- Shipped mobile apps with React Native
- Stack: React, Next.js, Angular, React Native, Node.js, NestJS, PHP/Laravel, TypeScript, Tailwind

Support Analyst II | EZ Commerce

Feb 2015 - Aug 2017 | Porto Alegre, Brazil

- Ticket and phone support for 500+ online stores on the EZ Commerce platform (formerly DCG, now part of Linx)
- Most troubleshooting meant reading JavaScript, JSON payloads, SQL queries and API responses to find where something broke
- Escalated critical cases to the dev team, explained fixes to store owners and covered after-hours support; issues tracked in Jira

Support Analyst I | Under

Jul 2014 - Feb 2015 | Porto Alegre, Brazil

- Support for hosting clients on shared and cloud servers, mostly domains, DNS and email setup (cPanel/WHM, WHMCS)
- Helped maintain the Linux servers, cloud environments and MS SQL Server databases behind the service

Projects

- **Instituto Movimenta** (institutomovimenta.org): website for a nonprofit that runs education, culture and environmental projects in 30+ cities in southern Brazil. Next.js, TypeScript, Tailwind and shadcn/ui
- **Freelancer management SaaS** (in progress): app for Brazilian freelancers and small businesses to manage clients and projects, track time, and handle contracts and invoices. Next.js, Supabase, Asaas payments API and Resend

Education

Technologist degree in Systems Analysis and Development (undergraduate, full stack and mobile track) | PUCRS, Pontifical Catholic University of Rio Grande do Sul | 2023 - 2025
